

Meet the twins!

Cardinal has not one, but two modern, full capability plants totaling 240,000 square feet, providing duplicate backups for our major systems:

- **3 EXTRUSION PRESSES** - up to 7" circle size
- **2 ANODIZING LINES** - 27 standard colors up to 24'
- **2 POWDER COATING LINES** - Up to 25'
- **2 DECORATING LINES** - simulate wood, marble, etc.
- **3 LONG BED 5-AXIS CNC MACHINES** - up to 22'
- **MULTIPLE OTHER CNC WORK CENTERS** - including bending, punching, sawing, etc.

All these capabilities give our experienced operators total accuracy and control over every job. That's why we can assume total responsibility for your entire project. We're proud that our customers rely on us with confidence.

So, see what our twins can do for you...Cardinal Aluminum,
Your Single Source Advantage...since 1946

Cardinal Aluminum Co. 1-800-EXTRUDE

MUCH MORE THAN A PRETTY PICTURE (FRAME)

Our competitors say, "Oh, Cardinal's just a picture frame company!" Sure, we manufacture picture frames, but that's just *one* of the many markets where we shine. Just take a look at this 6-hole, multi-hollow extrusion piece...

MOST EXTRUDERS WOULDN'T EVEN QUOTE THE JOB ...

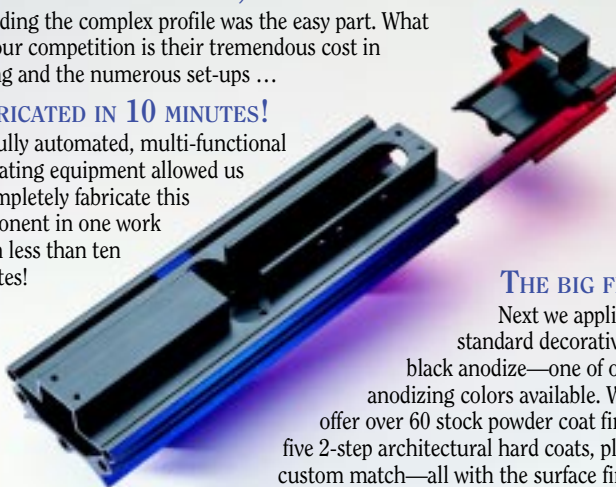

They claimed it was too difficult to *economically* manufacture due to its difficult shape, varying wall thicknesses, and extensive fabricating.

... BUT CARDINAL COULD, AND DID IT ALL!

Extruding the complex profile was the easy part. What kills our competition is their tremendous cost in tooling and the numerous set-ups ...

FABRICATED IN 10 MINUTES!

Our fully automated, multi-functional fabricating equipment allowed us to completely fabricate this component in one work cell in less than ten minutes!

THE BIG FINISH

Next we applied our standard decorative etch black anodize—one of over 20 anodizing colors available. We also offer over 60 stock powder coat finishes, five 2-step architectural hard coats, plus any custom match—all with the surface finish of your choice. And with our Image Graphics, your extrusions can look like *any* material!
