Luxurious Elegance Matched By Proven Durability

CERFOLD

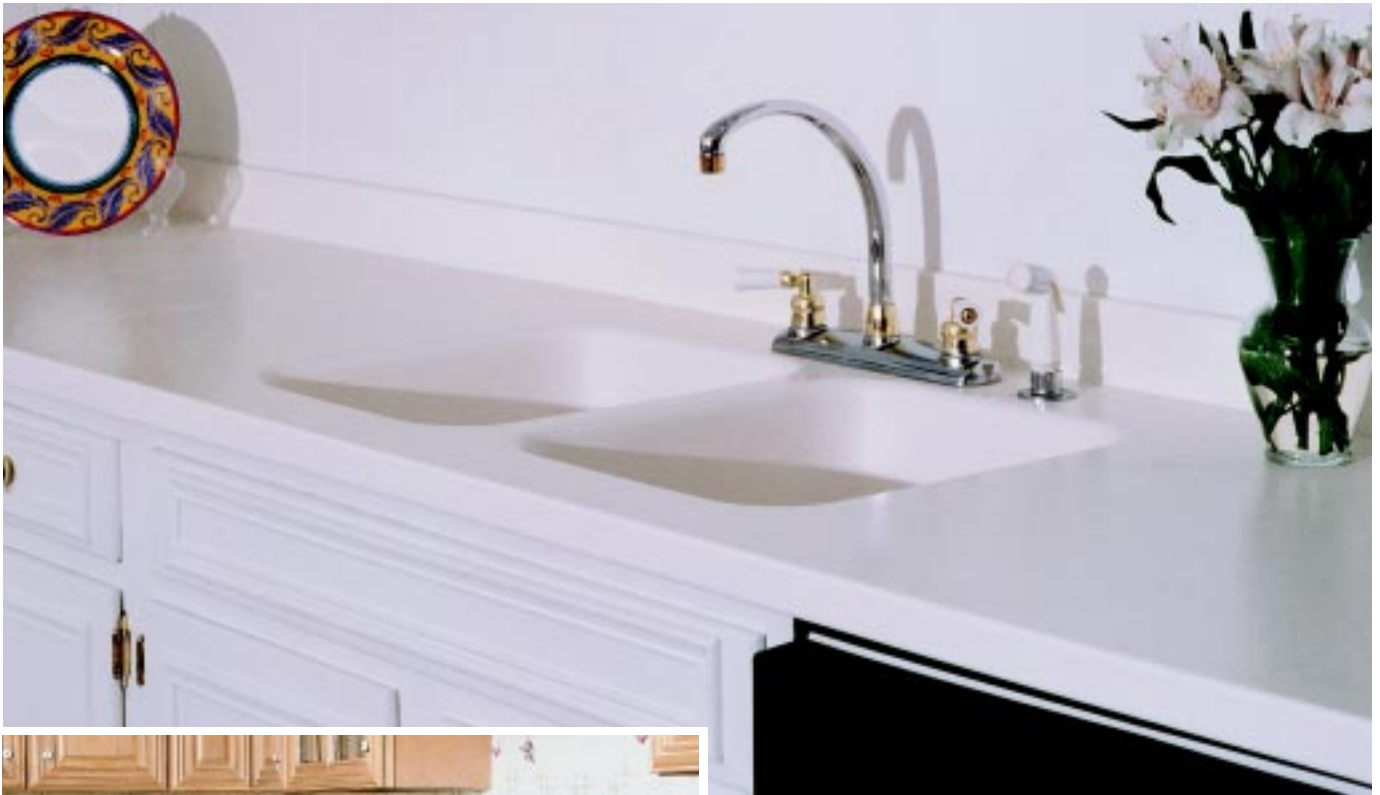

SOLID SURFACE BLANKS

A rich appearance has never been more affordable. That's because CERFOLD countertop units come pre-formed, complete with coved backsplashes and scribe rails. Best of all, they're made from our CERATA® solid surface products, the most elegant and durable countertop products in the industry. CERATA's physical properties make it tougher, stronger and more stain resistant than traditional countertop products. CERATA CERFOLD ... your best choice for lasting beauty, proven durability, and better value.

Hartson-Kennedy Cabinet Top Co., Inc. is one of the most respected names in the countertop industry. Our reputation for superior quality is backed by half a century of aggressive innovation, state-of-the-art manufacturing, unparalleled customer service, and the highest quality standards. Hartson-Kennedy products set the industry standards for excellence.

Solid Surface Blank Countertops

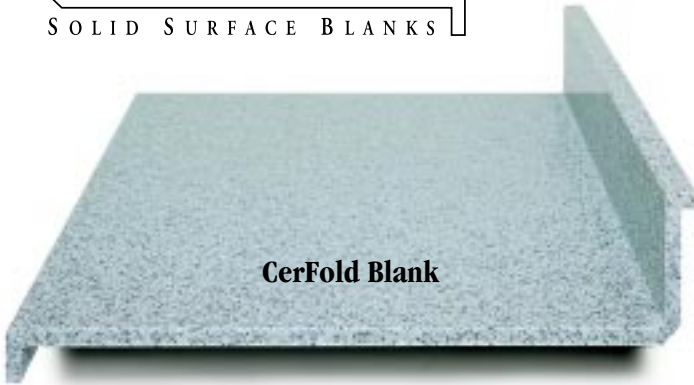

THE CERFOLD ADVANTAGE

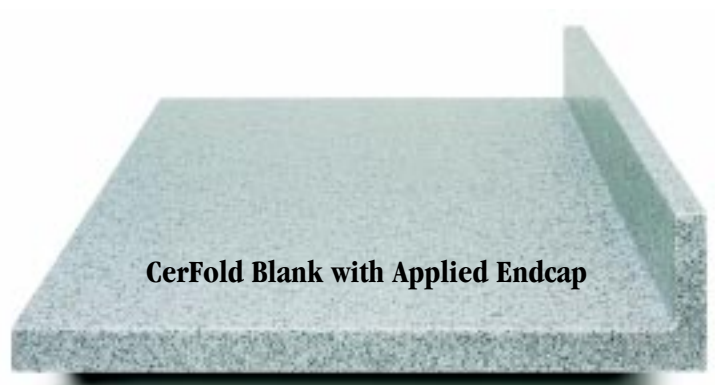

- *Pre-formed - saves time and money!*
- *Full 1/2" solid surface construction, not thin veneer or imitation material.*
- *Made from the finest, premium quality raw materials available.*
- *Decorative accent panels available for customized projects.*
- *The most sensibly priced solid surface products available!*

THE CERATA® GUARANTEE

- *Superior strength and proven durability.*
- *"Renewable" surface makes minor scratches and scrapes easy to repair.*
- *Sanitary surface: non-porous surface resists stains and the growth of bacteria, fungus, mold and mildew.*
- *Coordinating sinks and vanity bowls available.*
- *Consistent color, texture and workability throughout.*
- *Excellent "fabricator friendly" machining properties.*
- *10-year transferrable warranty.*

- Flat deck blanks have a full 1 1/2" front nose profile

Beautiful Durability

The unique performance properties of CERATA® Solid Surface Products ensure long-lasting beauty and durability.

All CERATA products are manufactured using a special ISO/NPG polyester-acrylic alloy resin, along with ATH fillers, pigments and matrix chips for superior strength and resiliency, high heat and stain resistance, UV stabilization, and highly desirable color clarity ... *all the properties that make CERATA Solid Surfacing your best choice for quality, durability, elegance and value.*

Stain Resistant

CERATA is highly resistant to most common household stains. However, some chemicals and solvents, such as oven, metal, toilet bowl, drain

and tile cleaners can damage the surface. If this occurs, simply follow the instructions in the CERATA Owner's Manual.

Easy Maintenance

CERATA's beauty is more than "skin deep" so very little maintenance is required to keep your CERATA products looking brand new for as long as you own them.

Easy to Clean

CERATA products normally wipe clean with a damp cloth. For "dried on" spots, a damp cloth and mild liquid soap is usually all that is needed.

"Renewable" Surface

Minor scrapes and scratches, tough spots and stains are easy to repair. Simply follow the instructions in the CERFOLD Owner's Manual.

10-Year Limited Warranty

All CERATA products are backed by Hartson-Kennedy Cabinet Top Co., Inc., the largest manufacturer of countertop products in the U.S. Hartson-Kennedy will repair or replace any CERATA product found to be defective, provided proper handling, fabricating and installation procedures were followed. For complete warranty information, contact Hartson-Kennedy or an authorized CERATA distributor.
